RINA MED

AUTOMATIC SLIDING STERN DOOR

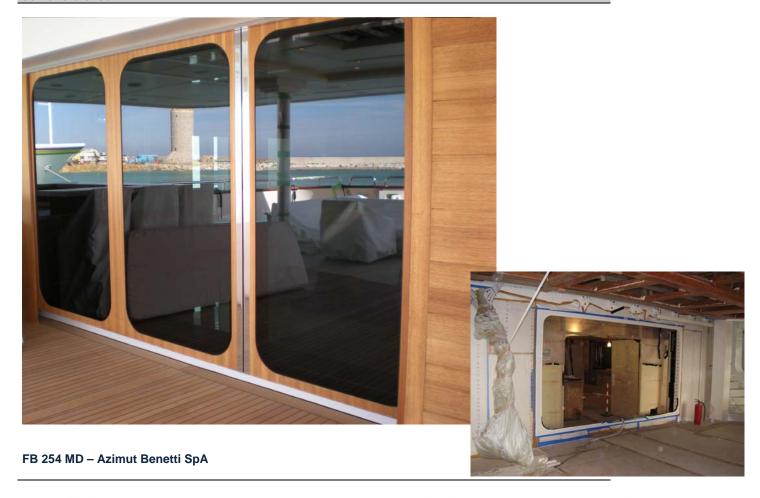

General Information	
description	sliding, glazed, shaped or plane leaf, single or double leaf
type	custom made door
manufacturer	Blu Bud srl

Description

Automatic sliding stern doors designed for internal or external installation (as shipyard request or technical requirement). The structure, with two fixed and one sliding or two simultaneously sliding panels, is in galvanized steel powder painted or in glossy polished AISI 316 stainless steel with tempered tinted flat or curved glass (as requirement).

The doors are operated by an external push button and electronic key controlled by a multifunction microprocessor and are supplied with a telediagnostics control panel, emergency battery backup power, an internal standard push-button panel with status indicator leds and a manual safety release in the event of a power failure. Upper and lower slide rails in stainless steel AISI 316, with pneumatic seals to guarantee the watertight seal at door. Automatic safe-closing features open the doors if they contact any resistance to closing.
