MEDITERRANEA

OPERA

When technology meets art

OPERA is the new concept by **Blu Bud**, developed in collaboration with **Giangi Razeto**, where the technical excellence of fire-rated and high noise reduction doors meets the creative power of art.

Each OPERA door begins as a high-performance marine-certified technical door, engineered to ensure **fire resistance, safety, and acoustic comfort**.

Then, through an artisanal and artistic process, its panel is transformed into a unique artwork, merging innovation, craftsmanship, and design sensitivity.

OPERA turns a purely functional element into a **piece of art** — a threshold that becomes emotion, a passage that becomes beauty.

OPERA

The fusion of engineering and artistic expression

OPERA collection transforms the door into a unique and unrepeatable work of art.

No longer just a functional element, it becomes a space of artistic expression: where fullness speaks to emptiness, light to shadow, the finite to the infinite.

Each door is conceived in dialogue with the architect and the shipowner, perfectly tailored to the yacht's interior style.

A door that becomes sculpture, designed to **inhabit the space as a living artwork**.

Gianni Razeto

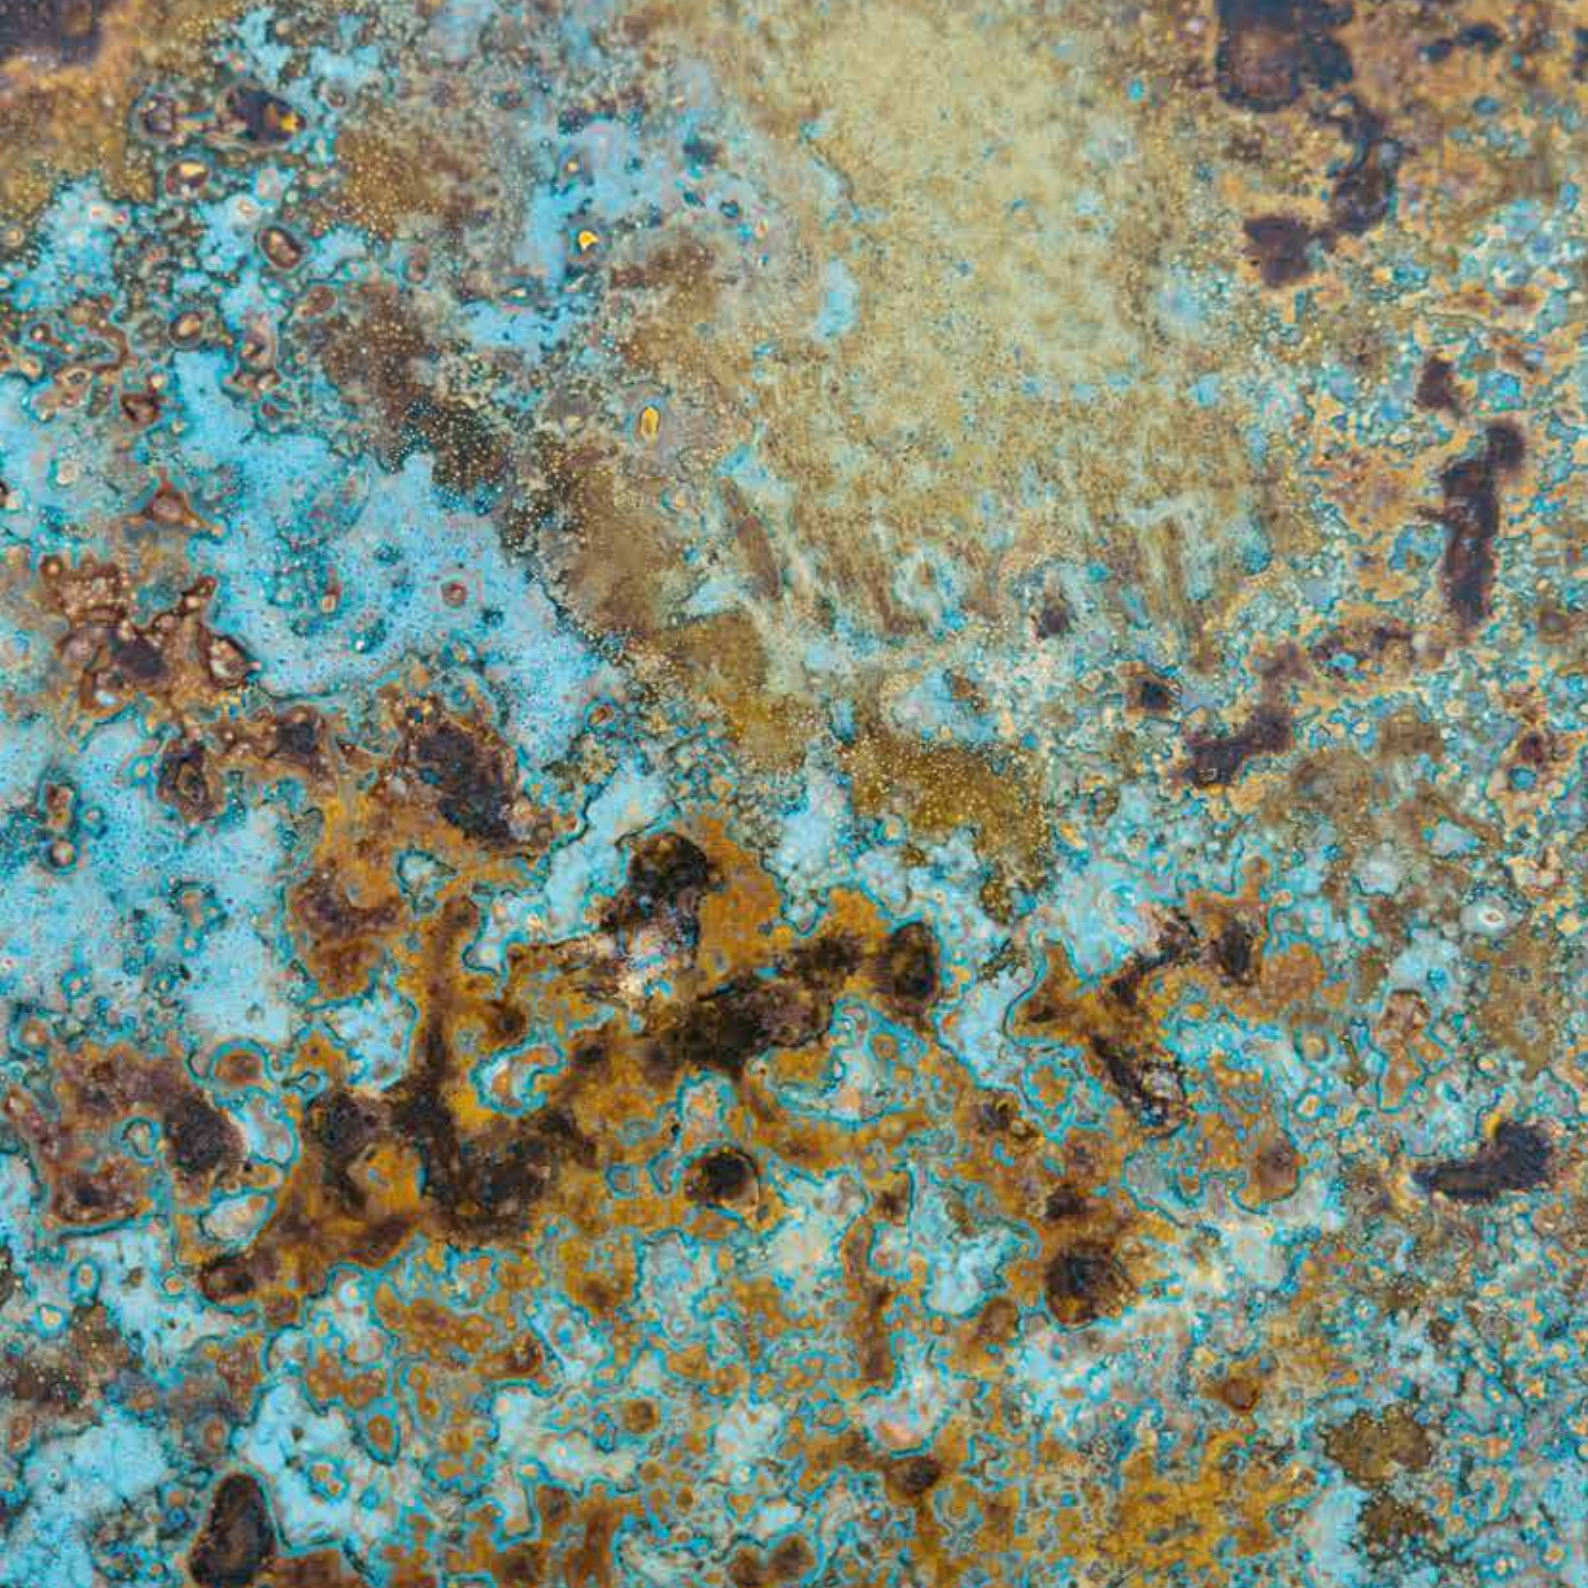

Between craft and soul

Gianni Razeto, sculptor and designer, merges technological innovation with artistic intuition. His works reveal the hidden soul of metal — often recycled brass, shaped with **flame, grinder, and hammer**, creating what he calls “**Contemporary Hieroglyphs**”: emotions engraved into matter.

For OPERA, Razeto created the first thematic series, **MEDITERRANEA** — a dialogue between sea and land, light and shadow, the finite and the infinite.

Oxidized brass evoke the solidity of the earth, while sculpted voids and luminous inserts recall the marine horizon.

Each door thus becomes island and archipelago, story and passage, artwork and threshold.
